Acerca de esta actividad formativa

Prepare for a career in the high-growth field of data science. In this program, you'll develop the skills, tools, and portfolio to have a competitive edge in the job market as an entry-level data scientist in as little as 5 months. No prior knowledge of computer science or programming languages is required. Data science involves gathering, cleaning, organizing, and analyzing data with the goal of extracting helpful insights and predicting expected outcomes. The demand for skilled data scientists who can use data to tell compelling stories to inform business decisions has never been greater. You'll learn in-demand skills used by professional data scientists including databases, data visualization, statistical analysis, predictive modeling, machine learning algorithms, and data mining. You'll also work with the latest languages, tools, and libraries including Python, SQL, Jupyter notebooks, GitHub, Rstudio, Pandas, Numpy, ScikitLearn, Matplotlib, and more. Upon completing the full program, you will have built a portfolio of data science projects to provide you with the confidence to excel in your interviews. You will also receive access to join IBM's Talent Network where you'll see job opportunities as soon as they are posted, recommendations matched to your skills and interests, and tips and tricks to help you stand apart from the crowd. This program is ACE® and FIBAA recommended —when you complete, you can earn up to 12 college credits and 6 ECTS credits.

(Optional)Obtain IBM Cloud Feature Code and Activate Trial Account

To facilitate hands-on skills development and enable you to complete some of the labs in this course, we are providing you with a special feature code for IBM Cloud.

This feature code will enable you to either create an IBM Cloud account without a credit card.

Please check the box and click on the **"Launch App"** button below to get a unique Feature Code to activate your IBM Cloud trial account.

We have also provided you with the stepwise instructions on how to create an IBM Cloud account for your reference.

NOTE: If you have already applied your IBM Cloud feature code in another course/lab to create an IBM Cloud account, please skip this item, as the code can only be used once.

CAUTION:

While signing up for an IBM Cloud account, or at a later stage, you may be prompted to enter a credit card. Please note that access to paid services or a credit card is **NOT** required to complete any mandatory labs/projects / or assignments in this course. Instead, those enrolled in this course have access to a **Feature Code**, which enables trial access to IBM Cloud for a limited duration. Therefore, we strongly recommend that you **DO NOT enter a credit card** to complete the required course components.

If you still choose to enter your Credit Card to use IBM Cloud services, you will be liable to pay any resulting charges billed to your credit card. The course team does not take any responsibility for such charges.

In case you encounter issues while activating your account with a Feature Code, or your trial has ended, and you have not yet completed the course, please contact the course support team via the course discussions forums for assistance instead of adding a credit card to your IBM Cloud account.

This course uses a third-party app, (Optional)Obtain IBM Cloud Feature Code and Activate Trial Account, to enhance your learning experience. The app will reference basic information like your name, email, and Coursera ID.

Coursera Honor Code☒ I agree to use this app responsibly.[Launch App](#)

Your IBM Cloud Feature Code

Copy the feature code below or click Activate Your Trial to get started with IBM Cloud.

NOTE: If you have already applied your IBM Cloud feature code in another course/lab to create an IBM Cloud account, please skip this item, as the code can only be used once.

CAUTION: While signing up for an IBM Cloud account, or at a later stage, you may be prompted to enter a credit card. Please note that access to paid services or a credit card is **NOT** required to complete any mandatory labs/projects or assignments in this course. Instead, those enrolled in this course have access to a **Feature Code**, which enables trial access to IBM Cloud for a limited duration. Therefore, we strongly recommend that you **DO NOT enter a credit card** to complete the required course components.
